The fuel system on those Cummins was called the PT fuel system, the letters standing for "Pressure" and "Time" respectively. Increasing the rail pressure on any engine will cause more fuel to be injected, and it was especially effective on those Cummins. There are better ways to go about it than restricting the return, though.

I would like to know what the factory spec is for fuel pressure on my small cam 350 cummins. I have the factory manual for this engine but it leaves fuel system information out of it. The CPL is 160. I had all I could do to get that from the local cummins dealer because my data plate is missing but I had the serial number.
