The environmental impact of concrete, its manufacture and applications, are complex. Some effects are harmful; others welcome. Many depend on circumstances. A major component of concrete is cement, which has its own environmental and social impacts and contributes largely to those of concrete.. The cement industry is one of the main producers of carbon dioxide, a potent greenhouse gas.

Livor mortis is frequently patterned when its development is hindered by vessels in dependent parts of the body being compressed. This occurs when prominent parts of the body, such as areas over bony structures, press firmly onto an unyielding surface due to the weight of the body, or when tight clothing compresses the involved vessel lumina (Figures 3 and 4(a) and (b)).

In her debut, *The Yellow House*, Sarah Broom insightfully examines the history of New Orleans East, the city's predominantly Black, working-class suburb, through the lens of her family's fraught attempt to build a stable life there. Broom begins her work by sketching detailed portraits of her grandmother, parents, and older siblings, before recounting her turbulent youth spent in New Orleans ...
