Some ICE 1 units have been equipped with an additional smaller pantograph to be able to run on the different Swiss overhead wire geometry. All ICE 1 and ICE 2 trains are single-voltage 15 kV AC, which restricts their radius of operation largely to the German-speaking countries of Europe. ICE 2 trains can run at a top speed of 280 km/h (174

A propelling nozzle is a nozzle
that converts the internal

energy of a working gas into propulsive force; it is the nozzle, which forms a jet, that separates a gas turbine, being gas generator, from a jet engine.. Propelling nozzles accelerate the available gas to subsonic, transonic, or supersonic velocities depending on the power setting of the engine, their internal shape and the pressures ...

Too much crown, higher than level, is very slow sailing, something to do with runner edge/ice geometry. Our builder, Buchholz, just happened to have a chunk of pretty clear spruce 2 X 12 with

a natural bend without twist that looked good to him so he sliced it into a plank which so far works well. Check your lumber yard for a bent 2 X 12 plank.
