How To Change The Harmanic

Determining the Harmonic Frequencies. Consider an 80-cm long guitar string that has a fundamental frequency (1st harmonic) of 400 Hz. For the first harmonic, the wavelength of the wave pattern would be two times the length of the string (see table above); thus, the wavelength is 160 cm or 1.60 m.The speed of the standing wave can now be determined from the wavelength and the frequency.

Physics Tutorial: Fundamental Frequency and Harmonics

First you make the hole change without a breath change, and then you make the combined breath and hole change. Next, extend the same moves through the middle register of the harp. From blow note on the left to draw note on the right. Sometimes a melody moves from a blow note on the left to a draw note on the right.
