Plane and Solid Geometry | J.M. Aarts | Springer

In the simplest sense, plane geometry is generally associated to two dimensions and solid geometry to three dimensions. In perception all the things we use and/or see in our mundane lives are in one way or another related to solid geometry that is they all have 3 dimensions that include length, breadth and thickness.

Difference between Plane Geometry and Solid Geometry ...

An area of study closely related to solid geometry is nets of a solid. Imagine making cuts along some edges of a solid and opening it up to form a plane figure. The plane figure is called the net of the solid. The following figures show the two possible nets for the cube.
