### R56 Carbon Build-Up Cleaning Procedure - WordPress.com

The heat of the exhaust gases exiting the combustion chamber burns the exhaust valves clean. However, on the cooler intake valve side, carbon can build up so much that it interferes with airflow through the intake port or even enough to prevent the intake valve from sealing properly when it closes.

### The Truth Behind Carbon Buildup | Team Valvoline

:cornut: OCC's have no effect on carbon build up. They are to prevent or greatly inhibit carbon build up in N14 MINI engines. Once that it's built up, you've bought yourself a 'walnut shell blow job' (so to speak) to remove it.

### 2nd Gen - R56 - Cooper - S - Carbon Buildup: Before and After

The carbon build up can cause drivability issues such as stumbling, flat spots and lack of power, poor throttle response, or in extreme cases, internal engine damage. In addition, Mini Cooper engine carbon build-up on the intake valves is commonly associated with an inconsistent idle and in some cases, a direct injection engine will not idle at ...

### Mini Cooper - Engine Problem - Carbon Deposits On Intake ...

This is a How-To on Removing the Carbon Build-up, the right way. I couldn't take it anymore with the decreased performance. My car has 60K miles on it (I bought it with 50K a year ago) and I don't think the carbon build-up has ever been removed properly. The throttle was sticking, the performance was down and it just felt like the car was ...

### 2nd Gen "How To" - This is a How-To on Removing the Carbon ...

Shortly out of warranty, my 2006 Mini Cooper S began to lose power, limp, and pop both "Service Engine Soon" code and the tire pressure warning light. This resulted in \$3800 of work due to "excessive carbon build up" that "rotted out" the cylinder 1 valve guide & seat and was eating the rest of the cylinders, too. Four hundred miles later the car is belching huge clouds of white ...

### R56 Carbon Build Up Cleaning Procedure - modapktown.com

Fix carbon buildup in engines. There are four fixes to carbon buildup issues. First, Make sure the software in your vehicle is up to date. Manufacturers are constantly issuing updates to solve these types of problems. If you own a BMW, Audi or VW with carbon buildup problems, ask the shop to update your vehicle's software.

### Clean carbon buildup in engines — Ricks Free Auto Repair ...

Intake Valve Cleaning - If the carbon build up is very bad then your auto service provider may recommend that the valves be cleaned using a spray method which involves injecting a cleaner into the air intake system. In extreme cases the intake manifold is removed and the carbon is blasted off with a special injection system that uses "walnut shells".

### BA Auto Care | 5 Q&A's: Intake Valve Carbon Build-up ...

Additionally, MINI USA recommends that the in-rail injection cleaning service be performed yearly (on a customer-pay basis) on N14 vehicles which currently do not exhibit the negative harmful effects of carbon build-up, to maintain MINI's dynamic performance and maximize fuel economy.

### **Mini Workshop Manuals > Cooper S (R56) L4-1.6L Turbo (N14 ...**

Come on along as we perform the de-carbon service on a 2007 335i. This vehicle has about 72,000 miles on it and had had this service performed previously, at about 45,000 miles. As you will see, from the video and photos, in just under 30,000 miles, there is significant carbon build-up in the ports and on the intake valves. NOTE:

### **BMW DIY Video - Carbon Cleaning N54 and N55 Intake Ports ...**

Because of the well-documented issue of carbon build-up in these engines, they clearly need to be periodically cleaned -- if a solution to avoid the build-up can't be found. But the claim occasionally made by MINI service centers that this has long been is a 'recommended' maintenance action is, in my estimation, spurious.
